ROHIT SHARMA

JAVA SOFTWARE ENGINEER | SPRING BOOT | BACKEND DEVELOPER

Jaipur, Rajasthan, India | +91-8875445062 | rohitsharma05824@gmail.com | linkedin.com/in/rohit-sharma-java | github.com/RScode-ai

SUMMARY

B.Tech Computer Science student and aspiring Java Developer with hands-on experience in Java, Spring Boot, MySQL, REST APIs, and backend development. Skilled in building practical applications and continuously improving problem-solving and software development skills.

TECHNICAL SKILLS

Languages	Java (Core Java, Java 8+), Python, SQL
Frameworks	Spring Boot, Spring AI, Hibernate, JPA
Backend & APIs	REST API Design, Microservices, CRUD
Database	MySQL Database Design & Query Optimization
Tools	Maven, Git, GitHub, IntelliJ IDEA, Postman, OpenAPI
Concepts	OOP, Data Structures & Algorithms, System Design Fundamentals, Exception Handling, Unit Testing (JUnit, Mockito), Agile Methodologies

EXPERIENCE

JAVA DEVELOPMENT TRAINEE — 45 Days

Lavya IT Training Center, Jaipur, Rajasthan

- Developed enterprise-style Java applications applying Spring Boot, Hibernate ORM, and microservices architecture principles
- Implemented JDBC and JPA-based database connectivity for real-time data operations, optimizing query performance
- Participated in daily code reviews and applied design patterns including Singleton, Factory, and Observer

PYTHON TRAINEE – SUMMER INTERNSHIP — 30 Days

GPC Solution

- Completed a 30-day summer internship focused on Python programming fundamentals
- Built a Weather Application in Python as the training project, applying core Python concepts

CORE PROJECTS

CRM AUTOMATION SYSTEM

Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, REST APIs, JWT, React.js, Maven, Git

- Engineered a full-stack CRM automation platform streamlining lead management, customer tracking, and sales pipeline workflows
- Implemented JWT-based authentication with role-based access control (Admin, Sales Executive), securing 20+ REST API endpoints
- Developed a React.js analytics dashboard visualizing sales pipeline stages and conversion metrics in real time
- Implemented centralized exception handling and server-side validation, reducing invalid data entries across the application

AI EMAIL MANAGER

Java, Spring Boot, Spring AI, OpenAI API, Gmail API, MySQL, JWT, React.js, REST APIs, Maven, Git

- Built an AI-powered email management application integrating the OpenAI API with Spring Boot to auto-generate context-aware replies, cutting manual response time by 50%
- Implemented intelligent spam and OTP detection with automated cleanup suggestions, reducing inbox clutter by 40%
- Designed a layered Spring Boot backend (Controller-Service-Repository) with JWT authentication and MySQL for persistent storage
- Implemented robust exception handling and attachment detection logic, ensuring reliable processing of 1,000+ emails during testing

EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE — 2023 – 2027

Rajasthan Technical University, Kota – Regional College for Education, Research & Technology, Sitapura, Jaipur

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Solved 100+ data structures and algorithm problems across LeetCode (50+), NeetCode and GeeksforGeeks
- Completed certifications in Java Programming Masterclass, Python and Data Analyst
- Secured 2nd position in an inter-college coding contest; active participant in hackathons
- Active open-source contributor on GitHub, focused on Java utilities and Spring Boot applications
